

# MATERIAL SAFETY DATA SHEET

Control of Substances Hazardous to Health 2002 (COSHH) & International Standard ISO 11014-1

## Section 1 Product and Company Identification

Kemmetech Galena G5000, G7200 & G8000 products are X-ray protective and noise barrier reinforced vinyl sheeting, naturally dark grey, but may be coloured for grade identification purposes.

Kemmetech Limited, Unit 4 Arnold Business Park, Branbridges Road, East Peckham, Kent TN12 5HE. Tel: +44 (0)1622 872724; Fax: +44 (0)1622 871993

## Section 2 Composition/Information on Ingredients

Composed of 75-85% metallic lead sulphide (Galena), encapsulated in a vinyl resin and plasticiser matrix with an internal polyester reinforcing scrim.

## Section 3 Hazards Identification

Metallic lead sulphide, which is encapsulated in vinyl resin, is only hazardous if ingested. Lead has not been found to be a human carcinogen.

## Section 4 First Aid Measures & Medical Information

SKIN: Lead has been reported to be only a mild skin irritant and absorption of inorganic lead through the skin is generally of no significance. Wash with soap and water.

EYES: Studies have shown that eye contact with lead causes only mild irritation and minimal inflammatory reactions. Flush well with running water to remove particulate. If irritation persists, get medical attention.

INHILATION: Remove from exposure, get medical attention.

INGESTION: Give water, induce vomiting and get medical attention.

Signs and Symptoms of Exposure: Systematic lead poisoning has symptoms of metallic taste, insomnia, weakness, constipation, abdominal pains and gastrointestinal disorder.

Medical Conditions Generally Aggravated by Exposure: Diseases of blood and blood forming organs, kidneys, nervous, and possibly reproductive systems.

## Section 5 Fire-fighting Measures

Flammability: Self-extinguishing

Extinguishing: Carbon dioxide, dry chemicals or foam

Special Fire-fighting Measures: Use chemical mask

## Section 6 Accidental Release Measures

Not applicable.

## Section 7 Handling & Storage

Cut edge of material is the main source of lead exposure. Wash hands after handling. Do not permit eating, drinking or smoking, while handling or working with the material. Practice good personal hygiene. Wash hands and face thoroughly before eating or drinking.

Store in a clean, dry warehouse. Rolls should not be dropped and should be layed flat where possible. Do not expose material to excessive heat, above 50C and/or humidity levels exceeding 80%.

## Section 8 Exposure Controls/Personal Protection

Latex (or equivalent) Gloves.

# Material Safety Data Sheet

---

## Section 9 Physical & Chemical Properties

---

Fully flexible sheeting supplied in various widths and roll lengths.

---

## Section 10 Stability & Reactivity

---

Inherently stable, soluble in certain solvents.

---

## Section 11 Toxicological Properties

---

The toxicological effects of lead are the same whether it enters the body through breathing or swallowing. Lead can affect most organs and systems in the body. The main target for lead toxicity is the nervous system. Long-term exposure of adults can result in decreased performance in some tests that measure functions of the nervous system. It may also cause weakness in fingers, wrists, or ankles. Lead exposure also causes small increases in blood pressure, particularly in middle-aged and older people and can cause anemia. Exposure to high lead levels can damage the brain and kidneys and may affect fertility.

---

## Section 12 Ecological Information

---

Lead is non degradable and will persist in the environment. It is insoluble in water and not attacked by most inorganic acids and bases.

---

## Section 13 Disposal Considerations

---

Waste Disposal: Classified in Europe as hazardous under EWC code 06 04 05. Should be disposed of in registered landfill sites in accordance with Local Authority regulations.

---

## Section 14 Transport Information

---

Not classed as dangerous for transport by Carriage of dangerous goods by road and rail regulations 1994.

---

## Section 15 Regulatory Information

---

Classification: Not Classified

---

## Section 16 Other Information

---

None.

---

## Section 17 Revision Dates

---

**Date of Issue:** January 1999  
**Revised Date:** May 2011  
**Replacing:** All previous Material Safety Data Sheets

The information and recommendations on this sheet relate to the specific materials designated and may not be valid for material used in combination with any other materials or in any process. The information is given in good faith and is believed to be accurate at the time of preparation. Nothing hereon is to be construed as a guarantee express or implied, in all cases it is the responsibility of the user to determine the applicability of this information or the suitability of the products for their own particular purposes.
